

EFACS E/8 Version 5

(ERP) Software

Overview

EFACS E/8 Version 5 is a comprehensive, flexible, fully integrated, browser based business solution which combines a variety of applications to be used in conjunction with engineering, sales, purchasing, manufacturing, stock, accounts, quality, planning, document management and customer relationship management (CRM). It is capable of being implemented in discreet, process, engineering and 24/7 production lines.

Highlights

- EFACS ERP Software stands alone in the Business Software market because customers can design and built new capabilities and functionality into EFACS as your business changes.
- Can be upgraded to add modules including Document Management, CRM, Workflow and Business Process Automation (unlike other systems which rely on third-parties).
- Includes its own browser, XML and Java based.
- Operates on a wide range of servers, operating systems and leading databases
- Includes the following key business modules:
 - Manufacturing
 - Document Management
 - Supply Chain Management
 - E-Commerce
 - Customer Relationship Management
 - Executive Information & Graphical Reports
 - Field Service Management
 - User Generated Software Customizations
 - Business Process Flows
 - Workflow Management

Benefits

EFACS E/8 enables employees to share information across the entire company through a completely integrated system. Quicker access to the same accurate information has a number of efficiency and productivity benefits.

Controls Costs

- Reduces Costs & Time through integration and sharing information across the your organisation.
- Delete ancient spreadsheets and older unmaintained applications.
- Boosts growth without extra cost or additional staff.

Increases Productivity

- Allows well-trained, motivated and knowledgeable staff to be redeployed into more profitable activities such as customer service, sales or other value-added projects.
- Improves communication internally as well as with customers and suppliers through automating the delivery of information to the various groups.

Increases Efficiency

- Allows production, finance, distribution, marketing departments to see the same information including stock figures, delivery dates, sales and margin analysis, etc.
- Provides Lean Technology for rapid downsizing to protect business and employment during times when there is a fall in demand.
- EFACS E8 can assist in automating your entire manufacturing process.
- Data only needs to be entered once into the system and can then be shared by multiple groups and users this saves time on duplication and reduces errors.
